User Profile
Item Description
Interaction
TASK: Sequential Recommendation
User ID: 821
Retrieve candidate items and rank them according to user 821's preferences
Correctness: TRUE/FALSE
Reason: "The ranking doesn't fully align with the user's preference for thriller movies, which are underrepresented in the top ranks. Prioritize items with thriller elements higher."
Planner $\mathcal{P}$
Refine Planning
Refine Ranking
Reflector $\mathcal{R}$
Validate workflow correctness and provide feedback
Retriever $\mathcal{W}_r$
Retrieve k candidate items
Analyst $\mathcal{W}_a$
Search database, provides insights
Decompose the task into an executable plan
Solver $\mathcal{S}$
Synthesize worker outputs to produce the final ranking
ANSWER: [423, 239, 146, 1158, 47, 88, 1152, 32]
Reasoning:
Ranked by relevance to user's preference for drama, thriller, and war movies, and high ratings for recent movies..
